

MIDWEST RCC PROJECTS

NEBRASKA AND KANSAS

Roller Compacted Concrete (RCC) Pavement is a plain rigid concrete pavement placed with high density paving equipment and then compacted with vibratory rollers. RCC can be placed quickly, expediting the construction schedule, and has the strength to withstand heavy and specialized loads. Its low cost and durability make it a preferable solution for engineers, owners and construction managers.

Below are some of the publicly funded paving projects completed by RCC PC members. Applications include arterial streets, local streets, highways, ramps, shoulders, medians, access roads and parking areas.

Biggs Street	Park City, KS	City Of Park City	Roadway	2023
Air Cap Road	Park City, KS	City Of Park City	Roadway	2023
Hartman Arena Drive	Park City, KS	City Of Park City	Roadway	2024
Biggs Street	Park City, KS	City Of Park City	Roadway	2024
Briarbrook Road	Park City, KS	City Of Park City	Roadway	2024
Prairie Lakes RCC Road	Valley Center, KS	City Of Valley Center	Roadway	2024

ABOUT THE RCC PAVEMENT COUNCIL

The Council is comprised of RCC contractors, equipment suppliers, materials suppliers, consultants, engineers and architects. Research and promotion are the primary objectives of the Members who strive to improve the quality of RCC pavements and expand their use in a responsible and sustainable manner.

The Council is an excellent resource to find qualified RCC Contractors, equipment, materials, and construction best-practices expertise as well as resources and support to the design community. The Council collaborates closely with industry promotion and research partners including the American Concrete Pavement Association ([ACPA](#)), the Portland Cement Association ([PCA](#)), and the National Ready Mixed Concrete Association ([NRMCA](#)).
